Rida Malik

AI & Automation Developer

malikrida406@gmail.com +92 342 121 1845 Karachi, Pakistan linkedin.com/in/rida-malik-softwareengineer

github.com/ridamalik26

AI and Automation Developer with production experience building LLM-powered applications and workflow automations. Integrated Groq, Gemini, and LLaMA models into chatbots, recommendation engines, and monitoring dashboards; built n8n pipelines for AI video generation and CRM call automation; and trained ML models for prediction and segmentation. Also builds full-stack apps with Python, Flask, Next.js, and Flutter.

EXPERIENCE

Cnergyico · Software Engineering Intern — Sep 2026 – Present

Machine Condition Monitoring Dashboard | Flask, Python, Groq API, LDAP

- Built Machine Intelligence Chat, a Groq-powered AI assistant grounded in live dashboard data that predicts alarms, answers in English and Roman Urdu, and suggests contextual prompts for each alarm or trip event
- Developed condition monitoring for turbine, compressor, lube oil, and pump & motor units with a 4-level setpoint system (Normal/Warning/Alarm/Trip), tag pins on machine images, and an admin layout editor
- Built date-range analytics with presets, playback with speed control, and average/max/min per range; automated historian data uploads with preview and automatic backups
- Implemented Active Directory (LDAP) login with per-account lockout, audit logging, and admin-controlled page visibility

Platts & IFEM Commodity Price Dashboard | Flask, SQLite, JavaScript

- Integrated 3 live pricing APIs (Platts, Ex-Refinery PKR, Retail Price PKR) with an admin API management panel for configuration, connection testing, on-demand sync, and health status monitoring
- Built role-based access control where admins choose which products and price sections each role can see, with products loaded dynamically from the Platts API and a Preview Dashboard as Role mode
- Developed price assessment tables with date-range and multi-symbol filters, weekly and monthly averages, product groups, and line/candlestick charts with daily, monthly, and yearly views
- Secured the admin panel with hashed passwords, rate-limited login, and sessions that persist across server restarts; set up a port 8501 gateway routing multiple dashboards into a unified directory

MI Advance (Market Intelligence) | Flask, Python, AD/SSO

- Developed an oil market intelligence dashboard tracking refinery production, OMC stocks, refinery-to-OMC supply flow (MS, HSD, FO), and tanker plans with port-wise subtotals
- Fixed a refinery production calculation error (64,580 to 114,209 MT) and a session cookie conflict between co-hosted Flask apps; added 3-state column sorting and persistent AD/SSO login

Project Management System (PMS) | Flask, Python, JavaScript

- Built a plan editor with prerequisite-chained scheduling, date constraints, and circular dependency detection, plus a phase editor for milestones and tasks
- Developed Task Assignments (my, team, and unassigned tasks by org hierarchy) with AJAX search and filters, and a Task Log for meetings and support work with time-spent tracking
- Automated multi-level approval workflows through the org hierarchy, including project completion gated on department approval, and built a printable project dossier export

Arius Automation · Full Stack Developer (Remote) — Apr 2026 – Sep 2026

n8n AI Automation | n8n, Gemini, Text-to-Speech, Shotstack, GoHighLevel

- Built an AI video generation pipeline that combines Gemini, text-to-speech audio, and Shotstack video rendering
- Built a GoHighLevel CRM workflow that automates call management

Arius Automation Landing Page | GoHighLevel, Calendly

- Built the company's lead-generation landing page on GoHighLevel targeting roofing businesses, with a lead capture form, Calendly booking for automation strategy calls, and GHL call functionality

Compass Circle Admin | Next.js, Supabase, GoHighLevel, GitHub Actions

- Automated an incremental, one-way GoHighLevel CRM sync into Supabase on scheduled GitHub Actions, tracking last-updated timestamps to pull only changed records
- Built a 10-screen CRM operations dashboard for a US client (Executive KPIs, Revenue & CRM, Client Journey, Bottlenecks, Compliance, Team Performance, Disputes) with role-based admin access, and resolved 18 UI review issues

Future Growth Readiness Audit | Next.js, TypeScript, Supabase, Airtable github.com/ridamalik26/growth-readiness-audit

- Built a CEO business assessment web app with 3 assessments (Industry Disruption, Organisational Readiness, Strategic Boldness), automated per-assessment and combined scoring, and a live public leaderboard
- Automated data capture by writing every registration, answer, and score to both Supabase and Airtable; added QR code access for event audiences and deployed on Vercel

Clouzark Database Platform | Express, TypeScript, React, PostgreSQL, Docker

- Built a multi-tenant database-as-a-service module that provisions an isolated PostgreSQL database and role per project on a dedicated production server
- Developed a Supabase-style dashboard with Table Editor, SQL Editor, schema visualizer, and RLS policy editor, plus auto-generated REST and GraphQL APIs with API key tiers and rate limiting
- Added end-user auth (email, GitHub and Google OAuth, magic links, TOTP MFA), storage with signed URLs, realtime, webhooks, cron jobs, and a secrets vault
- Hardened production PostgreSQL on a VPS (TLS, firewall, least-privilege roles), set up a self-hosted GitHub Actions runner to cut CI costs, and delivered 60+ GitHub issues

Softgrid Solutions · Mobile Application Development Intern (Remote) Jun 2026 – Jul 2026

MediRemind | Flutter, Node.js, Express, MongoDB, JWT github.com/ridamalik26/MediRemind

- Built a medicine reminder app with JWT auth, custom dose schedules, a daily Taken/Pending/Missed dashboard, 7-day dose history, and push notifications, backed by a Node.js/Express and MongoDB Atlas API

Kharcha | Flutter, Provider, SQLite github.com/ridamalik26/kharcha

- Built an offline expense tracker with local authentication, a real-time balance dashboard, categorized income and expense tracking, and full transaction history stored in SQLite

TaskFlow | Flutter, Riverpod, Go Router, Hive github.com/ridamalik26/taskflow

- Built a task manager with login and registration, full task CRUD, priority levels, due dates, search, categories, and completed/pending counts

PROJECTS

Smart Solar Advisor (Final Year Project) | Flutter, Flask, scikit-learn, Supabase github.com/ridamalik26/Smart_Solar_Advisor_

- Trained Gradient Boosting Regressors for solar system sizing and cost estimation and K-Means clustering for user segmentation, served through a Flask API to a Flutter app
- Integrated a Groq/LLaMA 3.1 chatbot for solar guidance and a 200-vendor directory; shipped a release Android build

Compass (AI Financial Goals Tracker) | Next.js, TypeScript, Supabase, Plaid, Groq/Gemini github.com/ridamalik26/compass

- Built an AI savings coach (Groq/Gemini) that generates personalized tips from Plaid-synced bank transactions
- Tracks 6-month, 1-year, and 5-year goals with pace indicators (Ahead/On Track/Behind); Supabase Auth with Google OAuth, deployed on Vercel

ProFolio (AI Career Companion) | Flutter, Riverpod, Supabase, Gemini API github.com/ridamalik26/profolio

- Built Gemini-powered job matching with session-cached recommendations
- Added an application tracker (Pending/Applied/Accepted/Rejected), resume storage with private signed URLs, and local notifications

AnswerDesk | Next.js, TypeScript, Supabase, HubSpot API github.com/ridamalik26/answerdesk-portal

- Automated HubSpot CRM sync on client creation within a role-based client and admin portal
- Built call logs with filters, search, and CSV export, plus minute usage tracking with overage risk alerts and billing history

EDUCATION

B.E. Software Engineering, DHA Suffa University, Karachi Jul 2026

Intermediate (CS), DHA College for Women, Karachi 2022

Matric (CS), The Educators, Karachi 2020

CERTIFICATIONS

Introduction to Artificial Intelligence (AI) IBM, Coursera

Flutter and Dart: Developing iOS, Android and Mobile Apps IBM, Coursera

Learn TypeScript Scrimba, Coursera

SKILLS

AI & ML	LLM integration (Groq, Gemini, LLaMA), prompt engineering, scikit-learn (Gradient Boosting, K-Means)
Automation	n8n, GoHighLevel, HubSpot API, GitHub Actions (scheduled jobs), REST APIs, webhooks
Languages	Python, TypeScript, JavaScript, Dart, SQL
Frameworks	Flask, Next.js, Flutter, Node.js/Express
Data & Infra	PostgreSQL, Supabase, SQLite, MongoDB, Docker, Vercel, Git, Linux/VPS
